

We feel very strongly that ownership of radio stations should be limited. The loss of local stations eliminates a training ground for young people as well as general local information and emergency announcements. Sportscasting of local games would not happen on stations with distant owners. Radio is vital to rural areas. The recent loss of one of our local radio stations has made an impact on our community and made us very aware of this problem. Please do not allow ownership to be increased by fewer and fewer people or companies.
